Is a Heat Pump More Efficient Than an Air Conditioner?

H1: How to get the most efficiency from your heating and air conditioning system.

It can be difficult for homeowners to decide on the most efficient choices for their [heating and air conditioning systems](#). Of course, cost efficiency and ease of use are always at the top of the list in requirements homeowners look for to find the most comfort, but how do you choose which product will be best?

When it comes to choosing between a heat pump and an air conditioner, some people may think they need to have both. However, while an air conditioner only provides cooling, a heat pump supplies both heating and cooling to make sure your home stays comfortable throughout the whole year, and could lead to significant savings down the road.

Choosing the Right Product

Here at Smoak's Comfort Control, we know the ins and outs of what suits our clients best. With over 40 years of experience in the Charleston, SC region, we have carefully chosen the array of heating and air conditioning services we provide for our customers.

There's no mistake in choosing either a heat pump or an air conditioning system, but as a heat pump provides the yearly comfort needed for your home, it would prevent you from having to buy two separate pieces of equipment. On top of that, if you're considering one of our maintenance agreements, having only one HVAC system will lower your risks of us discovering mechanical errors when we come to do our inspections.

No matter what you choose, Smoak's Comfort Control aims to satisfy all of your [heating and air conditioning needs](#). We're here to help you select the most cost-efficient option, and we're always available for any additional assistance you may require. If you have more questions about our products and services, click the link to contact us.

How Can Regular Maintenance Help Reduce My Energy Costs?

H1: What you need to know about a Smoak's residential maintenance agreement.

Whether you own a business or a home, [maintenance agreements](#) should be the first thing on your mind when buying any HVAC equipment.

During the life of your heating and cooling system, there are bound to be repairs needed. Sometimes these shock expenses can be costly, but preventative maintenance will help keep your system running smoothly for as long as possible.

How We Help You Save

Here at Smoak's, we've been helping our customers in the Charleston, SC region get the maximum life from their equipment for over 40 years. We inspect your HVAC systems regularly to catch minor problems before they turn into something major. By keeping your HVAC system running at its best, less power is needed for use, less repair is required in the long run, and that leads to huge savings in your bank account.

Your safety and comfort are at the top of our priorities list. Over the years, our customers have come back to us due to our friendly service and thoroughly trained technicians. When you sign up for a comfort plan, you can pre-schedule your future visits to make sure you only see us when it's convenient for you. We provide both residential and commercial maintenance plans, but either way, we always keep your equipment running smoothly.

Don't let your equipment break down or your power bill skyrocket before you consider a [preventative maintenance agreement](#). Click the link for more information about how the Comfort Control Plan can maximize the life of your HVAC system.

What Can Stop Mildew Growth in Vents in My Commercial Space?

H1: Take advantage of Smoak's commercial services for all of your ventilation needs.

If you're a business owner experiencing mildew or other problems in your building's ventilation, taking advantage of Smoak's Comfort Control's [commercial services](#) may be your best shot at fixing it. While there are preventative measures you can take to keep the mildew tame as best as you can, our team can assess the situation from the source, and aim for a more permanent

solution.

What Do Your Commercial Services Include?

It's difficult to know all of the ins and outs of getting ventilation shafts running smoothly, but with over 40 years of experience in the Charleston, SC region, our team is highly trained in getting the job done. We know there's some pretty stiff competition in the area, but the customer service, affordability, and professionalism we're known for helps us stand out.

Additionally, to save you from having to find as many other companies or contractors as possible to get the job done, Smoak's is here to provide your all-in-one service whenever your HVAC equipment needs a tune-up. Our services during the inspection include:

- Heat Pump Installation and Repair
- HVAC Installation and Repair
- Water Heater Installation
- Geothermal Systems
- Commercial Maintenance Plan
- And more!

We know the list of items on any business owner's to-do list never ends, and we want to make your work life as comfortable as possible by keeping your ventilation fresh.

Instead of taking consistent preventative measures that just don't seem to work, let Smoak's handle it for you. Our [commercial services](#) will help your equipment run smoothly, and keep you and your staff more comfortable. For more information, or to schedule an appointment, click the link to contact us, and we'll take care of all your heating and cooling needs.

Why Won't My Garbage Disposal Run?

H1: What to do if your plumbing needs a little extra help.

Is the [plumbing in your kitchen sink](#) giving you grief? If you've opened up the cupboards and pressed the reset button for the garbage disposal on the bottom of the pipe, and you're still finding it won't turn on, seeking professional help may be your safest option.

The plumbing in your kitchen can be one of the most complex to master. While you can complete some tasks on your own, if you've already tried a few troubleshooting tips, you may cause irreversible damage if the project is handled incorrectly.

How Can Smoak's Help?

Here at Smoak's Comfort Control, we have over 40 years of experience handling all of our customer's plumbing needs in the Charleston, SC region. We don't believe in glancing over the problem and finding a quick fix, either. The safety and comfort of your home is important to us, and we wouldn't want your kitchen sink to be out of order any longer than it has to be. Our services are timely and affordable, and we always make sure we get the job done right the first time.

Over the last four years, we've received the Angie's List "Super Service Award," and that's due to our integrity, hard work, and customer-focused approach. We handle repairs, installations, and any general maintenance you may need to get your kitchen's plumbing running back in its optimal condition.

If you're finding yourself stuck in a position where [your plumbing](#) just doesn't seem to be working the way it should, don't wait for the problem to fester before you get it fixed. If you click the link, Smoak's Comfort Control will have your kitchen back on track in no time.
